

SUMIT HATEKAR

Software Engineer — Backend (Java — Spring Boot)

Pune, India · sumithatekar9@gmail.com · +91 7387155502 · github.com/sumit1456 · linkedin.com/in/sumit-hatekar123

Profile Summary

Backend-focused Software Engineer specializing in scalable web applications using Java and Spring Boot. Experienced in designing secure REST APIs with Spring Security (JWT, OAuth2, Access/Refresh Tokens) and Rate Limiting. Proficient in database design, query optimization, and Redis caching. Skilled in cloud storage integrations (MinIO), asynchronous messaging, and deployment automation with GitHub Actions.

Technical Skills

Languages: Java (Core & Advanced), SQL, JavaScript (ES6+), HTML5, CSS3, Python
Frameworks & Libraries: Spring Boot, Spring Security, Spring Data JPA, Hibernate, React, Redux
Cloud & DevOps: AWS (EC2, S3, RDS, EventBridge), Docker, Git, GitHub Actions, MinIO Object Storage, CI/CD
Databases & Caching: PostgreSQL, Oracle SQL, Redis Cache, Database Indexing & Query Optimization
Architecture & Security: RESTful API Design, OAuth2, JWT (Access/Refresh Tokens), Rate Limiting, RabbitMQ, Maven
Testing & Documentation: API Testing via Postman, Swagger Documentation
AI Integration: LLM Integration (Groq AI Service), PDF Data Extraction

Experience

Full Stack Developer — Unified Examination Management Portal

<https://uems.corstack.in>

2025 – 2026

On-the-Job Training (OJT) · Team Project

- Designed and developed a secure, multi-region unified examination management backend using Spring Boot.
- Implemented RESTful APIs for managing complex domain relationships (Schools, Students, Exams, and Results).
- Integrated Redis caching to optimize queries and reduce database load for repetitive lookups.
- Developed an analytics module using custom JPA queries to generate admin dashboard statistics.
- Configured AWS RDS (PostgreSQL) and MinIO/S3 for secure, automated document uploads.
- Built React UI components and connected them to the Spring Boot REST backend using Axios.
- Deployed stack on AWS EC2 via Docker Compose, automated CI/CD with GitHub Actions, and optimized hosting costs.

Backend Developer — Deadstock Inventory System

2025 – Present

College Client Project (Institutional Commission) · Team Project

- Built a Spring Boot backend to manage, track, and audit institution-wide assets.
- Developed paginated REST APIs using JPA Specifications for efficient searching.
- Collaborated with frontend team to integrate APIs and optimize PostgreSQL operations.

Projects

ResumeMaker Pro — AI-Powered Resume Builder [\[https://resumemaker.corstack.in\]](https://resumemaker.corstack.in)

Sep 2025 – Dec 2025

- Developed a Spring Boot backend application for AI-powered resume creation, management, and optimization.
- Built secure user authentication flows using Spring Security, JWT (Access/Refresh Tokens), and API Rate Limiting.
- Integrated Groq AI service for real-time content enhancement and professional phrasing suggestions.
- Developed a PDF parsing and extraction service to extract layout data and map to resume DTOs.
- Configured an asynchronous notification flow using RabbitMQ, AWS EventBridge, and Brevo API.
- Designed relational database schemas with JPA to manage nested resume details deployed on AWS RDS.
- Built a React and PixiJS frontend for real-time graphical resume editing, hosted on AWS EC2 via Docker.

Education

Master of Science in Computer Applications

2025 – 2027 (Expected)

Savitribai Phule Pune University — First Year: 9.23 GPA

Certifications

Java Full Stack Development — QSpiders Wakad (2024)
